# 一、前言

美术想要一个把unity中\*.asset的模型导出来,导成3D Max可以打开的模式,fbx或obj.

## 需要导出的格式:

名称	修改日期	类型	大小
FH_Guard_Pole_Axe.asset	2014/1/19 6:47	ASSET 文件	20 KB
FH_Guard_sword_scabbard.asset	2014/1/19 5:04	ASSET 文件	12 KB
FH_Knight.asset	2014/1/19 5:04	ASSET 文件	162 KB
FH_Knight_hammer.asset	2014/1/19 5:04	ASSET 文件	16 KB
FH_Knight_shield.asset	2014/1/19 5:04	ASSET 文件	13 KB
FH_Knight_sword.asset	2014/1/19 5:04	ASSET 文件	15 KB
helmet_01.asset	2014/1/19 5:04	ASSET 文件	12 KB
helmet_02.asset	2014/1/19 5:04	ASSET 文件	17 KB
helmet_03.asset	2014/1/19 5:04	P ASSET 文件 CE	sdn. not <sub>15</sub> 0kertzhane

图1

也就是需要一个工具,个人觉得这个问题,肯定之前Unity的前辈就有解决方法了。于是乎网上一通下载和<mark>测试</mark>。

# 二、解包工具集合

网络上找来了各种测试,但是没有一个适合我的,很多都是失败,打不开。

参考宣雨松的博客,找了还是没有结果。

AssetsBundleExtractor_1.7_64bit.zip	2017/3/6 18:41	WinRAR ZIP 压缩	1,055 KB

理解HTC Vive更新——控制相机旋转和.. cartzhang : 这个暂时没办法测试。你若方 便测试下,请告我结果。每帧都硬扭回 来,怎么会扭不动呢》 不合理啊

理解HTC Vive更新——控制相机旋转和... zpciswinner : @cartzhang:确定是修改后 的代码(复制的图4下方的代码)。除了HTC 的相机,还有其他两个相机...

Unity中Vive Controller手柄模型渲染流... cartzhang : 若只是修改模型,最简单方法 是使用模型替换。在有就是在代码中隐藏原 有手柄模型,然后把自己新的模型显示出...

理解HTC Vive更新——控制相机旋转和... cartzhang : 确定使用的不是我错误的代 码,而是修改后的代码。有就是每帧都动态 的修改当前其他相机的值。

理解HTC Vive更新——控制相机旋转和... zpciswinner : 你好,博主。我使用了你的 方法,为什么其他相机还是会跟随头盔旋转 和移动(直接复制的代码)?

Unity中Vive Controller手柄模型渲染流... 天空之城-VR:你好,我想问一下,我要是 想改变手柄模型,当然我手柄上按钮是有事 件的,需要从第几步开始啊,看着有点迷。

Unity 实现Log实时输出到屏幕或控制台...

图3

解包工具有很多种类,

disunity github地址: https://github.com/ata4/disunity

还有就是AssetAssetsExport,还有Unity Studio.

别人的博客里面都有比较多的介绍和说明,这里就详细说了。

最后还网上wiki里,找到了一个合适的我自己的解包。

http://wiki.unity3d.com/index.php?title=ObjExporter

## 三、初步成果

找到了一个网站: http://wiki.unity3d.com/index.php?title=ObjExporter

可以导出部分对象。

如下图:

图0

而原来unity中模型是这个样子的。

cartzhang:@ghl1390490928:没有的话,自己在Asset下新建一个Editor!!
Unity 实现Log实时输出到屏幕或控制台...ghl1390490928:大神你好,Editor文件夹在哪
Unity 实现Log实时输出到屏幕或控制台...

ghl1390490928 : 大神你好, Editor文件夹

统计

在哪

图4

导出的只有武器和头盔,没有人物主体body.

# 四、bug修改

其实也不能算bug,也许人家没有这样的需要呢。

```
Component[] meshfilter = selection[i].GetComponentsInChildren<MeshFilter>();
MeshFilter[] mf = new MeshFilter[meshfilter.Length];
int m = 0;
for (; m < meshfilter.Length; m++)

{
        exportedObjects++;
        mf[m] = (MeshFilter)meshfilter[m];
}</pre>
```

代码中是要查找所有组件中的MeshFilter,发现SkinnedMeshRender组件居然没有这个MeshFilter这个组件,所以总会导出少一个,而这个居然是人的主体。

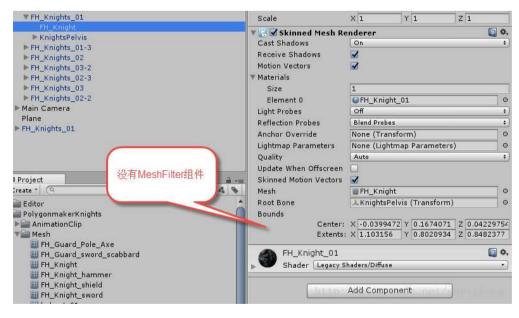

图5

本来说让美术自己添加一个MeshFilter组件,然后根据mesh render中的mesh自己来添加一个对应的mesh.

既然是程序,那就想办法,思路很明显,既然是有meshrender,就从这入手呗。

代码还是不难度。

```
// 没有meshFilter, 添加一个meshFilter.
SkinnedMeshRenderer[] meshfilterRender = selection[i].GetComponentsInChildren<SkinnedMeshRenderer>();
for (int j = 0; j < meshfilterRender.Length; j++)
{
    if (meshfilterRender[j].GetComponent<MeshFilter>() == null)
{
```

```
meshfilterRender[j].gameObject.AddComponent<MeshFilter>();
meshfilterRender[j].GetComponent<MeshFilter>().sharedMesh = Instantiate(meshfilterRender[j].sharedMesh);
}

10 }
```

这样修改过,就会自动在没有MeshFilter,但是有skinnedMeshRender组件的节点下,添加一个MeshFilter,然后就可以正常导出成.obj文件,与.FBX是类似的,都可以被3D max编辑使用。

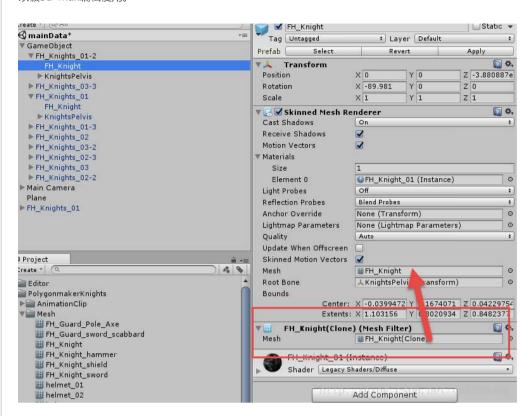

图7

最后的在VS中看的模型,因为没有安装3Dmax.

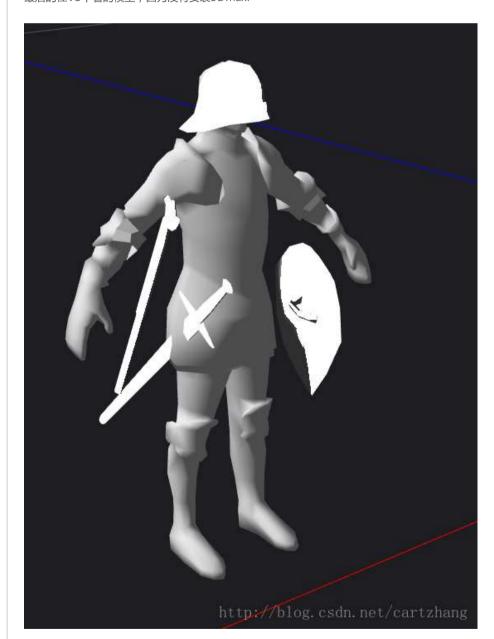

图6

虽然看起来简陋,但是满足他们小需要,就好了。

### 贴出主要的代码:

```
1 /*
```

Based on ObjExporter.cs, this "wrapper" lets you export to .OBJ directly from the editor menu.

3

```
4 This should be put in your "Editor"-folder. Use by selecting the objects you want to export, and select
    the appropriate menu item from "Custom->Export". Exported models are put in a folder called
    "ExportedObj" in the root of your Unity-project. Textures should also be copied and placed in the
6
 7
8
    N.B. there may be a bug so if the custom option doesn't come up refer to this thread http://answers.unity3d.com/questions/31795

```

可以直接复制到直接的项目中使用。

# 五、怎么使用呢?

首先把代码拷贝到项目中,直接下载工程也行。

步骤一

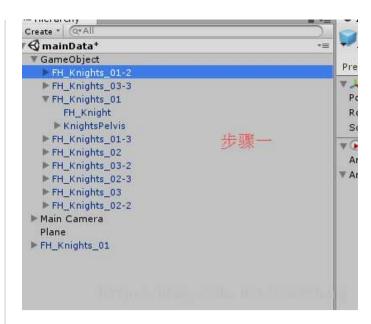

图8

#### 步骤二

图10

#### 步骤三

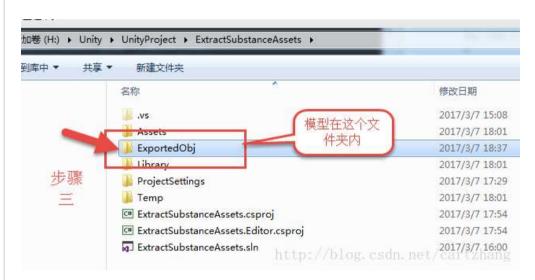

图11

就可以使用你的模型编辑工具来查看了。

### 五、源码和示例工程

源码地址:

https://github.com/cartzhang/unity\_lab/blob/master/ExportFbx/UnityAssetExportFBX/Assets/Editor/OBJExport/EditorObjExporter.cs

示例工程地址:

 $https://github.com/cartzhang/unity\_lab/tree/master/ExportFbx/UnityAssetExportFBX$ 

博客图片地址:

https://github.com/cartzhang/unity\_lab/tree/master/ExportFbx/Img

Github readme :

 $https://github.com/cartzhang/unity\_lab/blob/master/ExportFbx/Unity\%20 asset\%E6\%96\%87\%E4\%BB\%B6\%20\%E5\%AF\%BC\%E5\%87\%BAOBJ.md$ 

六、参考

- [6] https://github.com/KellanHiggins/UnityFBXExporter/tree/master/Assets/Packages/UnityFBXExporter

# 七,最后但不是不重要

Asset导出成FBX的格式: https://github.com/cartzhang/UnityFBXExporter

与上面介绍的不是一个方法,但是思路都一样。这个源码可以把**纹理和材质**都匹配上去,当然我也做了稍微的修改,修复了之前的小bug。

非常感谢,欢迎留言!!
